

## WATER MANAGEMENT POLICY

### Introduction

At Hotel I Dammusi in Borgo Cala Creta, we recognize the critical importance of water as a vital resource and are committed to using and managing it responsibly. This policy outlines our approach to conserving water, reducing water pollution and managing effluent in a sustainable and environmentally responsible manner.

### Scope of Application

This policy applies to all aspects of our operations involving water use and effluent management.

### Our Commitment

**Water Conservation and Efficiency:** We are committed to using water efficiently and conserving it wherever possible. This includes:

- Implementation of water saving technologies and practices.
- Regularly monitoring and managing our water consumption.
- Training employees on water conservation methods.

**Quality and Pollution Control:** We are committed to preventing pollution and maintaining water quality through:

- Ensure that effluents and discharges meet or exceed regulatory standards.
- Implementation of measures to reduce contamination of water sources.
- Conducting regular testing and monitoring of water quality.
- 

**Stakeholder Engagement and Compliance:** We are committed to engaging stakeholders and complying with all relevant regulations. This includes:

- Collaborate with local communities, regulators and environmental organizations.
- Ensure compliance with all local, national and international water regulations.
- Be transparent about our water management practices

**Risk Management and Emergency Response:** We will manage risks and prepare for water-related emergencies by:

- Identifying and evaluating potential risks in our use of water
- Develop and implement emergency response plans for water-related incidents.

**Continuous Improvement:** We are dedicated to continuously improving our water and effluent management practices through:

- Regularly review and update our policies and procedures.
- Keep informed of advances in water conservation and effluent treatment technologies.
- Set and review goals for water conservation and effluent reduction.

### **Review and Update**

This policy will be reviewed regularly to ensure it remains effective and relevant.

Updates will be made to reflect changes in technology, regulations and our business operations.
